

## Green Mouse

The wireless lighting  
self-adjustment compatible to any type of dimmable light

1

### ENERGY SAVINGS

- The controlled use of lighting assures energy savings and at the same time, the well-being of the person by keeping the desired level of brightness.

2

### SELF MANAGEMENT OF THE LIGHT

- Wireless timer with built-in astro function and wireless movement detector can be programmed to automate the light.

3

### COMFORT AND WELL-BEING

- **Automatic functioning** of the device due to the built-in sensor which detects the brightness and sends a wireless signal to the receiver to adjust the lights.
- **Immediate and simple installation**, the Green Mouse is registered on the receiver and enters operation.

### FLEXIBILITY

4

- Possibility to change the light intensity at any time.

5

## COMPATIBILITY

- Green Mouse can be placed on the table to ensure the desired light level on your working position or on the wall to ensure the room light level.

### Automatic comfort and efficient control.

The Green Mouse assures smart lighting to your room; light intensity is automatically adjusted according to the variation of the natural light, maintaining constant the pre-set light level.

#### Components of the system:

- **Green Mouse**, wireless transmitter with integrated light sensor.
- **Radio receiver** with dimmer function connected to the light.

## FUNCTIONING OF THE GREEN MOUSE

### HOW TO ACTIVATE IT:

- ✓ Turn ON the light with a transmitter programmed for the ON function and the Green Mouse is active.

### HOW TO SET IT:

- ✓ Choose the desired light level by dimming UP and DOWN with the buttons CH1 and CH2.
- ✓ Store the desired level with button CH3.
- ✓ ON/OFF button to enable or disable the Green Mouse control with CH4.

### DURING OPERATION:

- ✓ Green mouse checks the light level and automatically dim UP and DOWN to adjust the light intensity according to your pre-set level set with CH4.

### HOW TO DEACTIVATE IT:

- ✓ Turn OFF the light with a separate transmitter programmed for the OFF function.

### CHARACTERISTICS:

- Wireless transmitter
- Built-in light sensor
- Possibility to control a group or single lights
- Ideal for houses, offices and warehouses
- Table-top application
- Wall mounted application
- Battery powered
